The Natura Series

is an energy-efficient glass solution, offering superior solar control and thermal insulation properties. The new range of Natura series from the Ecosense range of high-performance glass is a perfect blend of great aesthetics, visual impact, and energy savings. With varied visible light transmission (VLT), it allows selection of products based on the building design to allow optimal natural light while managing heat and contributing to additional points for green certifications. Natura's aesthetic versatility and neutral tone make it ideal for architects and designers focused on sustainable, visually appealing spaces. It's perfect for sectors like commercial, residential, healthcare, and education, providing durability, thermal comfort, and reduced CapEx and OpEx.
